

OPMT7750 ASSIGNMENT 5

CAPSTONE PROJECT DATA MODEL

This assignment must be completed and submitted to earn a grade on the Capstone Project.

Once you have determined your problem statement and analytic questions and sourced your data for your Excel data model you will submit an outline of your Capstone Project and detail the process you will take to build your data model. The feedback you receive on this submission should be incorporated into your final written report. You will create a document with the following pages and components:

Cover Page

- Include the Title, Student Names, Course Name, Instructor, and Date.

Company Overview & Background

- Provide background on the firm
- Discuss the current situation the firm finds itself in

Problem Statement

- Describe the problem you are trying to solve
- One sentence, written as a question
- Can be open-ended (setting no constraints) or closed-ended (with constraints and/or conditions.)

Analytic Questions

- Use a table to present your questions

Analytic Question(s)	Why is the answer to this question important? Think, "so what?"

Process & Limitations

- Describe the data you will analyze, where it came from and the process you will undertake to collect and analyze it, sharing any limitations that exist (Note that this section will be written as a plan for what you will complete (you will adjust this in your final capstone report to past tense.)
- Provide information about your data sources and your data model (see the Assignment Sample)
